DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 17, 19, and 20 are rejected under 35 U.S.C. 102(b) as being anticipated by Shei (US 4,757,800). Shei discloses the claimed invention, a method of controlling oven temperature comprising providing two cross-sheets [62A,62B] in an intake duct parallel to a direction of airflow flowing into an oven, wherein the intake duct has a convergent geometry [56B], and two intake fans [58A,58B] proximate the cross-sheets supply airflow for the oven; see Figure 6. See entire document.

Allowable Subject Matter

Claims 1-16 are allowed.

Claim 18 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: Claims 1-16 are directed to unobvious improvement over the invention patented in U.S. Patent Number 6,248,158 B1, wherein the improvement comprises an intake

duct having convergent geometry to accommodate a small oven. Claim 18 is directed to unobvious improvement over the invention patented in U.S. Patent Number 4,757,800, wherein the improvement comprises a cross-sheet conforming to the convergent geometry of an intake duct.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Cross-sheets are disclosed by Smith (US 5,683,240), Marchini (US 5,830,262), and Illingworth (US 6,623,352 B2).
